Here is a yummy secret I know.
You can eat a whole rainbow!

SCHOLASTIC

Cut along dotted lines. Put the pages in order to make a book.

Orange carrots and apricots,
pumpkins, papayas, and kumquats.

Red tomatoes, apples, and cherries,
radishes, and red raspberries.

2

Yellow bananas, lemons, and pears,
star fruit slices, and pineapple squares.

4

Purple eggplant, onions, and beets,
Purple cabbage, and grapes to eat.

7

Green avocados, artichokes, too,
asparagus, limes, and honeydew.

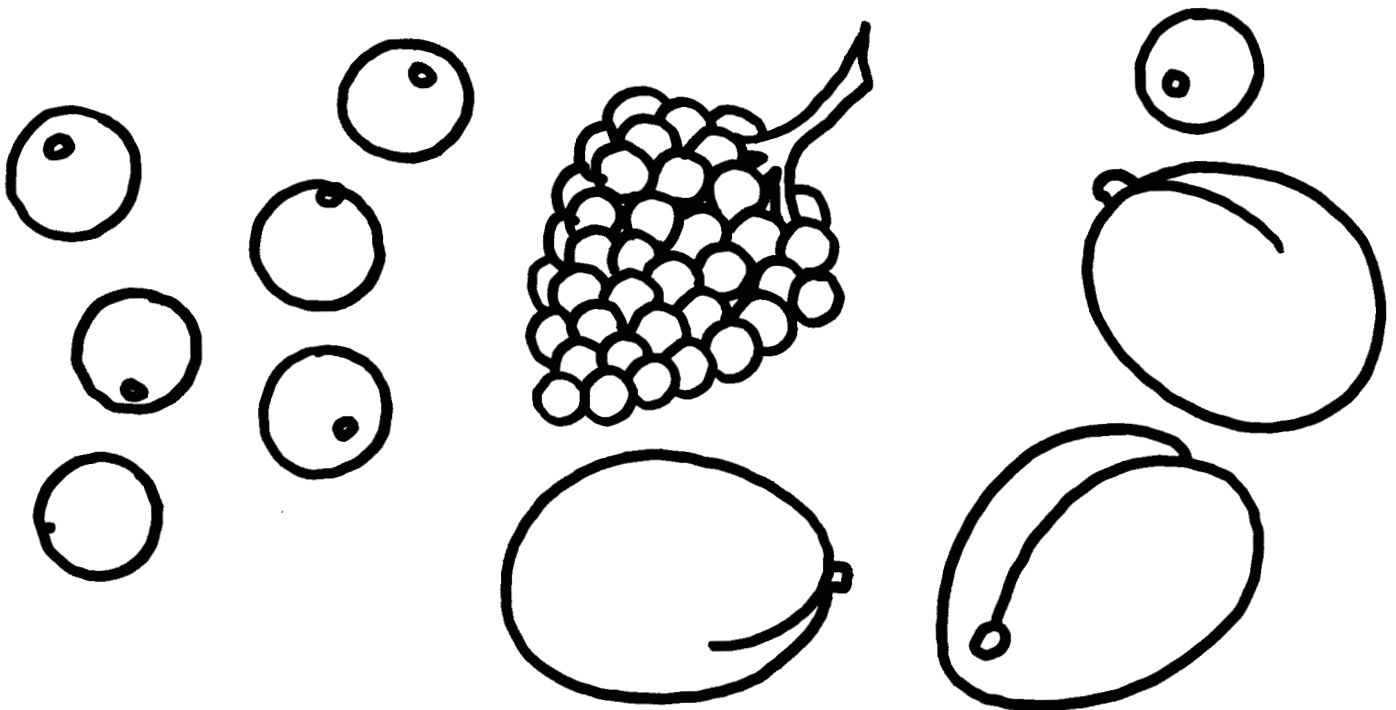

5

Now you are finished, and now you know.

8

You can eat the whole rainbow!

Blue blueberries, of course, are blue,
huckleberries, and sugar plums, too.
